Art Unit: 3753

This action is responsive to the communication filed 2/22/202.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-28 are rejected under 35 U.S.C. §102(b) as being anticipated by GB 751,060. GB 751,060 shows a globe valve having a body 1, an eccentric cage 6 having rounded cross members 18 and bevelled faces 18, either of which read on the recitations of "angled". GB 751,060 includes a plug 7 for closing the valve and has a chamber between the body and cage which is narrower opposite the outlet. The portion of the cage 6 opposite the outlet in Figure 5, for example, is read as triangular.
